

HYDRAULIC CRIMPER

Placement Program

An ISO Certified Company

HERE'S HOW IT WORKS

MFC will loan a Hydraulic Hose Crimp Machine that you can use at no cost. In exchange for the use of the machine, MFC requires three things:

- A signed loan agreement.
- An agreement that you will purchase all hose and fitting products from MFC.
- An initial stock up inventory order to be mutually agreed upon by you and your MFC representative (typically \$5000).

Why This Program Makes Sense for You

- You get the use of a new or completely refurbished machine without the initial investment.
- Your only expenditure is to purchase hose and fitting inventory...items that you need to purchase anyway.
- You reduce your downtime, or the downtime of your customers, by having the capability to produce hydraulic hose assemblies on site.
- MFC's line up of hose and fitting products meet or exceed SAE specifications and are competitively priced.

How Do You Take the Next Step?

- Contact your MFC Account Manager or send us an email at info@mnflex.com so we can help walk you through the process.
- Determine what sizes and styles of hydraulic hose and fittings you use or may use in the future.
- Place an order for the appropriate inventory of hose and fittings.
- Schedule a time for your MFC Account Manager to meet at your facility to conduct machine training.
